Ceramic tiles are one of the most common materials for covering walls in various building environments and architectural and construction projects. which is used in different dimensions and designs.

Among the best types of them, the following can be noted:

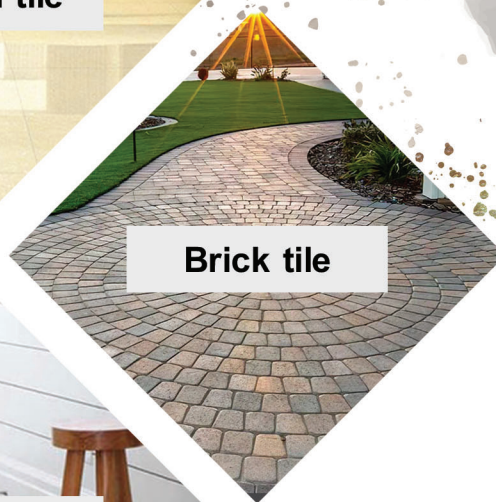

porcelain tile

Glazed tile

Paving tile

Brick tile

Mosaic tile

Unglazed tile

Glazed tile

A glass layer is actually placed on these tiles after construction for more care and ease of cleaning. These tiles are used to cover different spaces such as washrooms, bathrooms, kitchens, etc. The strength of these floorings can be seen in their design and color.

porcelain tile

One of the types of tiles is porcelain tile. Porcelain tiles have high density and resistance due to being baked at high temperature. This issue also makes this type have more strength and hardness compared to other types. Other advantages of this tile can be He mentioned the beauty, easy maintenance, high wear resistance and usability in busy environments.

Mosaic tile

These tiles are available in two types of porcelain and ceramic. Mosaic tiles are made in square shape and in sizes of 2.5 square centimeters. This tile can be used as tiles between cabinets or short walls, as well as bathroom floors, swimming pools, etc. Mosaic tiles have a wonderful visual beauty and are easy to install, they are also compatible with the environment and are very easy to maintain and clean.

Paving tile

These types of tiles usually have an appearance similar to bricks and belong to the category of floor tiles or floor ceramics. Of course, these tiles are thinner in terms of thickness.

Paving tiles are an excellent choice for covering the floor of the bathroom, building and patio.

These tiles will also maintain their color and appearance against direct sunlight.

Brick tile

These tiles can be considered one of the most widely used types of tiles. The reason for naming this category is because of their similarity to bricks.

These tiles are usually used in interior and exterior wall tiles, and if they are arranged correctly, they add a special beauty to the environment. Also, in this model, there is no need to tie to install tiles and they can be installed even on old surfaces.

Other advantages of this category include variety of designs and colors, very low water absorption, easy washing and low purchase cost.

Unglazed tile

This type of tile actually has all the characteristics of mineral tiles. The strength of mineral tiles can only be considered slightly higher. These types do not have a shiny surface and this has made many people not interested in using them for different spaces.

Bouniz is a reliable brand in the field of producing all kinds of tiles and ceramics.
